Technical Data Sheet

ZIPTUBE standard, blue

Please note that this information sheet applies exclusively to our products with blue backing material. Due to the wide range of applications.

Product and Care Information

Carrier material:	Polyester fabric reinforcement, PVC-coated on both sides, dirt-repellent finish, standard colour blue, black on the inside
Zipper:	Coil zipper, 6.5mm, separable Metal dividing device (nickel-free) Slider with automatic locking mechanism, stainless steel (nickel-free), colour-coated Straps: Polyester, 16mm
Sewing thread:	Polyester, dtex strength 750(3)

Care — Autoclave sterilization is not permitted

Surface disinfection:	Alcohol-based surface disinfectants in the form of sprays or cleaning wipes, such as Propano® AF, Terralin® liquid, esteer® disinfectant wipes. Alcohol-free surface disinfectants are not recommended, as they may cause discolouration over time.
Washing:	Wash at temperatures up to 40°C using commercially available mild detergents.
Storage	The ideal storage temperature is 15–20°C. Never store at temperatures of 0°C or below. Store in a dark place and protect from UV radiation.

ZIPTUBE makes every effort to manufacture its products to the highest quality standards and uses only high-quality materials. Please note, however, that these textile aids have a limited service life due to the demanding conditions of use, cleaning and disinfection.
